COLOR CHART

BCK GRAFFIATO PAINT

Our specialty lies in creating exquisite textured paint that adds depth and character to walls and surfaces. From subtle textures to bold patterns, our range offers endless possibilities for expressing your unique style.

BCK Graffiato paint is a protective and decorative coating for external and internal spaces over lime and cement bases.

BCK Graffiato is formed from very fine colored quartz sands, resistant to UV light; special acrylic binders which are highly water repellent; fungicides and other special chemical additives.

The BCK Graffiato formula prevents fungus and mold growth — with every stroke providing an excellent resistance to atmospheric agents and bacteria to improve the longevity, resilience, protection, texture, and overall finishing on your interior and exterior walls.

What's more? We have a wide catalog of customizable colors, textures, and crafty wall designs to inspire a whole new artistic experience — bringing innovation, creativity, therapy, durability, vibrancy and more shades to your world!

BCK GRAFFIATO PAINT
